

Asonta Kelvin

Experienced software engineer with a focus on building engaging & accessible digital experiences

Professional Summary

Full-Stack Software Engineer specializing in Laravel, React, and MySQL, with a Statistics background that strengthens data-driven decision-making. Builds secure, scalable web applications — including SaaS platforms, multi-tenant systems, and REST APIs — from the ground up. Focused on clean architecture, maintainable code, and shipping production-ready software.

Experience

Independent Projects

Dec 2022 - Present

- Designed and built multiple production-style Laravel web applications from concept to deployment.
- Developed RESTful APIs consumed by React front-ends across several independent projects.
- Designed relational database schemas supporting multi-tenant and role-based systems.
- Implemented secure authentication and authorization using Laravel Sanctum.
- Built responsive, accessible interfaces using React and Tailwind CSS.
- Managed version control and codebase organization using Git.
- Profiled and optimized database queries to improve application response times.

Selected Projects

Move2Bio — Link-in-Bio Platform (In Progress)

Tech Stack: Laravel, React, Tailwind CSS, MySQL, Sanctum

- Built a full-stack link-in-bio SaaS platform with secure user authentication via Laravel Sanctum.
- Developed REST APIs powering a dynamic, customizable user dashboard.
- Implemented a fully responsive UI in React and Tailwind CSS, optimized for mobile-first use.

Nenetel Menu — Restaurant Menu Website

Tech Stack: Laravel (API backend), React (AI-assisted frontend), MySQL, Sanctum

- Built a restaurant showcase website for a small business, featuring a public menu page and an admin-only content management panel.
- Developed a Laravel REST API backend to power menu items and content, with the admin able to post and manage listings directly (no public user accounts or payments).
- Designed a landing page with a countdown feature to build anticipation ahead of the main site launch.
- Integrated an AI-assisted React frontend with the custom-built backend API.

Skills

Programming Languages

- PHP
- JavaScript
- SQL
- HTML5
- CSS
- Python

Libraries & Frameworks

- Laravel
- React
- Tailwind CSS
- Vue.js
- Alpine.js
- Livewire
- Vite
- Axios
- Laravel Sanctum

Tools & Platforms

Git, GitHub, Netlify, Vercel, WordPress, Composer, Postman, Docker, Cloudflare, Redis

Concepts

REST APIs, MVC Architecture, Authentication & Authorization, Database Design, API Integration, CRUD Applications, Responsive Web Design, OOP, Multi-Tenant Architecture

Additional Information

- Strong analytical background from Statistics, applied to data-informed engineering decisions.
- Passionate about backend engineering and scalable software architecture.
- Fast learner with excellent debugging and problem-solving skills.
- Interested in SaaS, fintech, enterprise software, and AI-powered applications.

Educational Background

Bachelor of science (B.Sc.) in Statistics

Michael Okpara University of Agriculture, Umudike

- Relevant coursework in Data Analysis.
